CROP BOOSTER® 15-3-6 PLUS BORON, MANGANESE, MOLYBDENUM AND ZINC

GENERAL INFORMATION
CROP BOOSTER® 15-3-6 foliar nutrient solution will promote foliage development and vigor in fruit, vegetable and row crops. This product must be used as a supplement to a complete fertilizer program that is adapted to the fertility level of the soil. This product is generally used to aid foliage development early in season and also to relieve stresses caused by agro-chemicals, drought, excessive moisture, hail or summer frost. This product can be applied to all crops. All residues in the jug are normally water soluble. Rinse and add the solution to the sprayer. If the residues are crystallized, dissolve completely in hot water and add the solution to the sprayer.

NOTE
Foliar treatments supply only a portion of the three major plant nutrients (nitrogen, phosphorus, potassium) required for successful crop production. CROP BOOSTER® 15-3-6 is recommended for use as a supplement to a basic fertilizer program that is adapted to the fertility level of the soil.

FOLIAR TREATMENTS
For best results, treat the crop when it is actively growing, early in the morning, late in the day or during overcast periods. Use a minimum of 200 L of water per hectare (ha). With Ultra Low Volume (U.L.V.) sprayers, use at least 50 L of water/ha. If the spray solution is too concentrated, slight injury to the leaves could occur. For aerial applications, do not use more than 1 L of this product for every 4 L of water.

APPLICATION RATES
Use 2 L of this product per hectare when this product is tank mixed with herbicides. Use 2.5 to 5 L of this product per hectare for all other uses, unless otherwise advised.

Consult your professional agrologist or extension specialist for recommendations on appropriate tank mixtures and application rates when using this product.

15-3-6 PLUS BORON, MANGANESE, MOLYBDENUM AND ZINC

Ingestion: Do not induce vomiting. If victim is conscious and alert, rinse mouth with water and give a glass of water or milk to dilute material.

Storage:
This product must be kept above 0°C and must not be stacked more than two (2) pallets high with each pallet two (2) pallets high.

Disposal of Empty Containers:
Triple rinse, dispose of empty container in accordance with municipal/provincial/federal regulations or recycle.

Notice:
Seller warrants that this product consists of the ingredients specified and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. No one, other than the officer of seller, is authorized to make any warranty, guarantee or direction concerning this product.

Grapes and fruit trees: Treat as soon as the foliage appears and repeat every 7 to 10 days until mid-July. This product will promote foliage in order to support an optimum crop without hindering winter hardiness.

Raspberries and strawberries: Treat as soon as new spring foliage appears and repeat every 7 to 10 days or as necessary thereafter. This product, if applied during picking, may delay maturity of the fruit and could lengthen crop picking period.

Potatoes and vegetables: Treat as soon as possible to improve crop establishment and repeat every 7 to 10 days or as necessary thereafter. This product is also useful to supply additional nutrients to restart plant growth, when plant growth is affected by drought, excessive moisture, hail or summer frost.
