

Calstik™

GUARANTEED MINIMUM ANALYSIS: Total Azote (N) 2%, Calcium (Actual Ca) 13%

GENERAL INFORMATION

Calstik™ C₁₂ 13% Calcium is a foliar nutrient solution. This product can be applied to all crops. Applications of this product must be based on leaf or soil analysis, deficiency symptoms or plant requirements.

Shake well before product is poured into sprayer.

NOTE

Calstik™ C₁₂ is recommended for use as a supplement to a complete fertilizer program that is adapted to the fertility level of the soil.

Consult your agricultural representative for advice in selecting treatments from this label that best fit local conditions.

FOLIAR TREATMENTS

For best results, treat early in the season. Treat the crop when actively growing, early in the morning, late in the day or during overcast periods. Use a minimum of 200 L/ha of water in cash crops and a minimum of 300 L/ha of water for horticultural crops. If the spray solution is too concentrated, slight injury to the leaves may occur.

RATE OF APPLICATION

Fruit trees

5 L/ha every 7 to 10 days, starting 10 days after Calyx until harvest.

Raspberries and strawberries

5 L/ha Every 7 days, starting at first signs of fruit coloring until the end of harvest.

This treatment will greatly improve shelf life and fruit firmness.

Broccoli and cauliflower

2.5 L/ha Every 7 days from the beginning of head formation until harvest, specially during fast growth periods following hot and dry conditions.

Cabbages

5 L/ha during every growth spurt period following hot and dry conditions.

Carrots

5 L/ha make 3 treatments at 2 weeks interval starting when when foliage has reached 15 to 20 cm.

Celery

5 L/ha during every growth spurt period following hot and dry conditions.

Lettuce

5 L/ha during every growth spurt period following hot and dry conditions.

Peppers and tomatoes

2.5 L/ha make 3 applications 1 week apart starting a week after formation of first fruit.

Repeat during every growth spurt period following hot and dry conditions.

In general, for horticultural crops, use at a maximum concentration of 2% of the solution. (ex application of 4.0 L/ha should be applied with a minimum of 200 L of water/ha).

STORAGE

This product must be kept above 5°C.
